SELECTED OPEN-SOURCE WORK AND POSTS

Cancensus²

R Package

- Access, retrieve, and work with Canadian Census data and geography.
- Co-creator, Maintainer
- Available on CRAN > 1000 dl/month

Cansim³

R Package

- An R package to retrieve and work with public Statistics Canada data tables.
- Co-creator
- Available on CRAN > 1500 dl/month

Airportr⁴

R Package

- A package to work with open source airport data with tools to look up information, translate names and codes into other formats, as well as some basic calculation functions for measuring distances.
- Creator
- Available on CRAN > 750 dl/month

Diversity and segregation in Canadian cities⁵

Writing/Post

- Applying information theory measures to quantify ethnic diversity and segregation patterns in Canadian cities using Census data

Mirror images: city similarity with t-SNE⁶

Writing/Post

- Identifying similarity of Canadian cities using high dimensional clustering and t-SNE visualizations

I regularly blog about data science, package development, and visualization on my personal site at dshkol.com⁷
